

sound *labradoodle*

October 2017 – We are on hiatus! No litters currently planned. We will not have puppies until 2019. Thanks to all of our wonderful puppy families!

We strongly believe that better puppies come from making the best selection of the sire and dam for temperament, health, history of training, and working as a service dog or companion. All of these factors have contributed to make the Australian Multigenerational Labradoodle the perfect family companion.

Here's a short clip of Dolly's last litter with Trace. 7 Chocolate and 3 cream. They had a great time in the yard!

All of our puppies will be standard size, maturing around 22" in height and ranging from 50-65 lbs. We take extra care to provide puppy training early so they are the best family companion. We love to talk with families to help them find out more about the great personality in our puppies, our breeding, and training philosophy. Please give us a call or [contact us online](#).

That's our Australian Multigenerational Labradoodles Sleighbelle on the left and [Ava Starr](#) on the right. This was our family portrait at our wedding in July 2008 with both of our girls. We love our labradoodles and they are absolutely the best companions we could have hoped for and more. We raise and train the puppies in our home. They are a big part of our family.

We encourage you to spend some time on our website to learn more about our puppies and the Australian Labradoodle breed.
